BADASS PROFESSIONS II

6 × 45' (ENG, GER)

Badass Professions returns for a second season!

In six episodes, the series follows, among others, crab fishermen on the high seas, salt miners and underground workers, steel makers, canal workers or overhead line fitters. The men and women who work in these fields are rarely envied, because in addition to physical exertion, there are often dangers, unpleasant smells or even dirty working environments. All jobs require not only skill and ability, but also courage. They are nothing for the faint-hearted.
