KILLER IQ – LION VS. HYENA

2 x 52', 90' (ENG, GER)

This is not a battle of eternal enemies—but a war of wits.

World-famous 'lion whisperer' Kevin Richardson, together with the world's leading behavioural zoologists will identify lions' as well as hyenas' behaviour when it comes to solving exciting, entertaining, and ground-breaking tasks and riddles, custom-tailored to the animals in question. Cognitive awareness and social intelligence will be put to the test: how well will the animals fare when it comes to tasks such as puzzle boxes, rope pulling or mirror mazes? Which animal is more hard-wired for social cooperation and forming alliances? This series is not about trying to find a winner – but instead will reveal why each of these species is the ultimate specialist in their own unique way.
