

SCIENCE . TECHNOLOGY

SUPERSAPIENS

2 x 50', 80' (ENG, GER)

As artificial intelligence rapidly blurs the boundaries between man and machine, we face an astonishing question: are we witnessing the rise of a new human species?

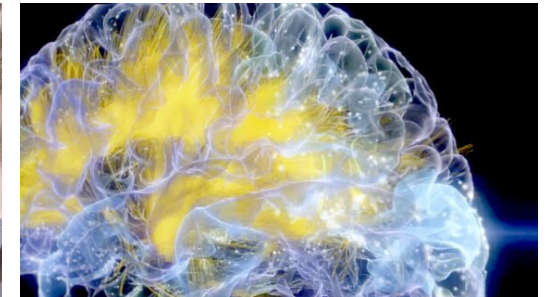

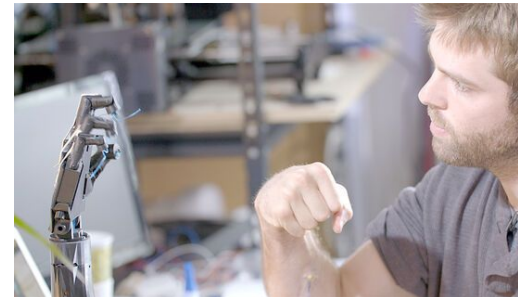

As the scientific community and the military seek to finally unmask the matrix of human consciousness, the film poses a crucial question: can we risk this discovery? Can we prevent ourselves from going too far? To quote former US president Barack Obama, "There are fewer and fewer technical constraints on what we can do. That places a special obligation on us to ask tough questions about what we should do."

'SuperSapiens' not only brings exclusive insights into the world of artificial intelligence and consciousness-hacking but gives a first-hand account into how an awakening technology is already claiming physical access to our very own bodies.

Original Title: Supersapiens - Der neue Mensch

Year: 2017

Produced by: Terra Mater Factual Studios

1. Enhanced Humans

Physical connections between man and machine are on the verge of becoming mainstream. In this episode, we explore technologies that promise superpowers and witness experiments that are literally changing minds!

2. Human Machines

Episode 2 takes us into a sci-fi world where machines are on their way to becoming 'almost human'. From robots that can walk and run on two legs, to OpenWorm, the project that 'brought to life' the first digital 'living being', and on to Sophia... an extremely sophisticated and very intelligent 'female' android.
