MIAMI WILD

50' (ENG, GER)

In the last century, Miami has become a melting pot of wildlife from around the globe – this is the story how these animals helped to keep Miami Wild...

The stories of American cities are inextricably linked with the tales of immigrants making their lives there. Nowhere is this more obvious than in Miami, a city Barack Obama called “the capital of Latin America.” In the last century, Miami has also become a melting pot of animal immigrants from around the globe. Miami Wild is a wildlife story that’s never been told before: the story of animal immigrants staking their claim and creating new lives for themselves alongside people and native species in America’s wildest metropolis.
