

NATURE . WILDLIFE

WONDROUS & WILD

50' (ENG, GER)

A glimpse at the marvelous life all around our planet.

What's in a day? From sunrise to sunset and well into the night, we encounter births and deaths; joyous moments and dangerous situations; apparent ennui and sudden excitement.

All these adventures, by day or night, have taught old and young to stay vigilant, to relax when time allows it, to save their energy or spend it wisely. And after a long day and maybe even a longer night, a new morning dawns. Come rain or shine – it's gonna be wondrous & wild!

Original Title: Ein wilder Tag
